

Derek A. Hamilton

VITA

Revised: Sep 9, 2018

Professor of Psychology, The University of New Mexico

Email : dahamilt@unm.edu

Address: MSC03 2220

1 University of New Mexico

Albuquerque, NM 87131

Webpage : www.unm.edu/~dahamilt

Phone : 505-277-3060

Educational History

- B.A. 1996. The University of North Carolina at Charlotte. Psychology.
- M.S. 1998. The University of New Mexico. Psychology.
Thesis title: Categorical picture-word interference for vocal and manual production
Tasks: Evidence against the dual-coding and name retrieval hypotheses
Thesis advisor: Paul C. Amrhein, Ph.D.
- Ph.D. 2003. The University of New Mexico. Psychology.
Dissertation title: A behavioral and comparative analysis of human place learning in a virtual Morris water task.
Dissertation advisors: Robert J. Sutherland, Ph.D. and Michael J. Dougher, Ph.D.
- Postdoctoral fellow. 2003-4. Canadian Centre for Behavioural Neuroscience.
Advisor: Bryan Kolb, Ph.D.

Employment History

- 2004-5 Visiting Assistant Professor of Psychology and Neurosciences
The University of New Mexico, Albuquerque, NM 87131
- 2005-Present
Professor, Department of Psychology
secondary appointment Department of Neurosciences (UNM School of Medicine)
The University of New Mexico, Albuquerque, NM 87131

2016-Present	<i>Professor</i>
2010-2016	<i>Associate Professor</i>
2005-2010	<i>Assistant Professor</i>

2011-2017 Chair: *Cognition, Brain and Behavior Area*.
Spr. 2018 Acting Chair, Department of Psychology

Membership in Professional Societies and Organizations

- Research Society on Alcoholism (RSA)
- Fetal Alcohol Spectrum Disorder Study Group (FASDSG)
- Society for Neuroscience

Professional Recognition, Honors, and Awards

- Arts and Sciences Award for Teaching Excellence, 2009-2010. The University of New Mexico
- 15th annual Benjamin Franklin Haught Memorial Lecture Award, 2003.
Department of Psychology, The University of New Mexico
- Postdoctoral fellowship, 2003-4. Alberta Heritage Foundation for Medical Research
\$35,000 annual stipend and \$3,000 research allowance for 2 years.
- Outstanding New Investigator, 2003. Fetal Alcohol Syndrome Study Group
- Outstanding Senior in Psychology, University of North Carolina at Charlotte, 1996.

RESEARCH, TEACHING, AND SERVICE INTERESTS

My research interests include two major topics: 1) the behavioral and neurobiological consequences of moderate prenatal alcohol exposure (PAE), and 2) the basic behavioral and neurobiological processes involved in mammalian spatial navigation. I utilize a range of structural, electrophysiological, and immediate early gene expression techniques to address basic questions regarding the effects of PAE on neural plasticity, brain function, and behavior. Current work is focused on the consequences of moderate PAE on synaptic plasticity and glutamatergic signaling with an emphasis on frontal cortex circuitry underlying important behavioral consequences of PAE, including behavioral flexibility, spatial learning and memory, and social interaction. A second ongoing line of research in my laboratory is aimed at better understanding the basic behavioral and cognitive processes involved in common laboratory tests of spatial learning and memory, including the Morris water task for rodents and the virtual Morris water task for humans, with the goal of advancing understanding of brain-behavior relationships in these and related tasks that are commonly used to study relationships between neural and behavioral/cognitive processes.

My teaching interests include courses at the undergraduate and graduate levels on the neurobiology of behavior and fundamental processes involved in learning/memory, and the effects of drugs on brain plasticity and behavior. I am also closely involved in teaching and mentoring of students enrolled in the Psychology Honors program. Helping undergraduate students, graduate students, and postdoctoral fellows to become effective, independent researchers and advance to the next stage of their training or career is major goal of my mentoring efforts.

My service interests include contributing to the University's research mission through Chairing the Institutional Animal Care and Use committee, which ensures compliance with federal law and regulations for research at UNM involving non-human animal species. I served as Chair for the Cognition, Brain, and Behavior (CBB) Area in the Department of Psychology from 2011-2017, which includes 13 faculty and 20-25 doctoral students. I also contribute broadly to the field by serving as a member on a National Institutes of Health grant review panel at the National Institute on Alcohol Abuse and Alcoholism, and serving as an officer for the Fetal Alcohol Spectrum Disorders Study Group, an international organization of scientists, providers, and students focused on better understanding the damaging effects of alcohol on the developing nervous system and pursuing treatment strategies.

RESEARCH FUNDING

Active Funding:

Title : Neuroinflammation : Role in FASD cognitive deficits (PI : P Drew)

Agency : NIAAA

Proposal # : 1R01AA026665-01A1

Funding Period : 8/2018 - 8/2023

1.2 Calendar

Role: Co-I (PI on UNM Subaward)

Title: Impact of SAR152954 on prenatal alcohol exposure-induced neurobehavioral deficits.

(PI : DD Savage)

Agency: NCATS

Proposal # : UH2 TR002082

Funding Period : 8/2017 - 7/2019

1.2 Calendar

Role: Co-I

Title: Prenatal Alcohol Exposure and Neural Representations of Space

Agency: NIH/NIAAA
Proposal # : R21 AA02498
Funding Period : 1/2017-1/2019
Total Direct Costs : \$275,000
Role: PI, co-PI Benjamin Clark

Title: Fetal ethanol-induced behavioral deficits: Mechanisms, diagnosis and Intervention

Agency: NIH/NIAAA
Proposal # ; 1P50AA022534-01
Funding Period : 08/2014 – 06/2019
PI : D.D. Savage
Role : Co-Investigator (Admin core)

Title : Alcohol research training in neurosciences

Agency : NIH/NIAAA
Proposal # : 2T32 AA014127
Funding Period : Aug 1, 2013 – July 31,2018
PI : C. Fernando Valenzuela, Ph.D.
Annual costs : \$118,504
Description : The main goal of the project is to train pre-doctoral students in neuroscience-related alcohol research.
Role: Mentor

Past Funding:

Title: Over-arousal as a mechanism between alcohol and intimate partner violence (PI: BC Fink)

Agency: NIH/NIAAA
Proposal # : 1R21 AA22367-01A1
Funding Period : 09/2015-08/2017 (NCE)
Direct costs : \$275,000
Role : Co-I

Title: Fetal-ethanol-induced deficits in agranular insular cortex function

Agency: NIH/NIAAA
Proposal #: AA019462
Funding Period: Mar 1, 2011 – February 28, 2016
Total costs: \$1.17M
Role: PI

Title: Fetal Ethanol Effects on Histaminergic Regulation of Neurotransmission

Agency: NIH/NIAAA
Proposal #: 1R01AA19884-01A1
Funding Period : 7/2011-6/2016
PI: D.D. Savage, Ph.D.
Total Costs : \$1.04M
Role: Co-I

Title: Prenatal ethanol exposure and neural representations of space

Agency: NIH/NIAAA
Proposal # ; 1P50AA022534-01
Funding Period : 12/2014 – 05/2015
Total Costs : \$27,500
Role : Pilot project co-PI with B.J. Clark

Title : Effects of chronic exposure to the atypical antipsychotic olanzapine on functional networks in the anesthetized rat brain

Agency : NIH/NCRR
Proposal #: P20RR021938
Total Costs: \$25,000
Funding Period : 4/2011-3/2012
Role : PI on 2011-12 pilot project
This is a pilot project for the Mind Research Network Schizophrenia COBRE (*Neural Mechanism of Schizophrenia*, PI : Bustillo)

Title : Fetal alcohol induced behavioral deficits: Mechanisms, diagnosis and intervention (P20 Center Grant)

Agency: NIH/NIAAA
Proposal #: 1 P2 AA017068-01
PI : Daniel Savage, Ph.D.
Funding Period: July 1, 2008 – June 30, 2013.
Role: Co-investigator on project #4, "Effects of novel cognition enhancing agents on fetal alcohol induced behavioral deficits."

Title : Screening putative therapeutic agents for fetal-alcohol-induced learning deficits

Agency : NIH/NIAAA
Proposal #: 1 R21 AA016619
Funding Period : Mar 31, 2007 – Mar 30, 2010
Direct costs: \$275,000
PI : Daniel Savage, Ph.D.
Role: Co-PI

Title : Prenatal ethanol, social behavior, and prefrontal cortex

Agency : NIH/NIAAA
Proposal #: 1 R21 AA015356-01A2
Funding Period : Mar 31, 2006 – Mar 30, 2009
Direct costs: \$262,500
Total costs: \$381,500
Role: PI

Alberta Heritage Foundation for Medical Research (AHFMR) Postdoctoral Research Grant

Dates: 1/2003-8/2004

Project Title: "Effects of stimulant drugs on experience-dependent synaptic plasticity"
The goal of this research project is to characterize the effects of stimulant-induced changes in dendritic structure and spine density on subsequent experience-dependent structural plasticity.
Role: Postdoctoral-fellow; Tissue-preparation (Golgi-Cox staining) and quantification of dendritic length, branching, and spine density: Behavioral analysis (e.g., learning and motor behavior).
