

CURRICULUM VITAE

Name Sarah Jane Erickson

Department Address University of New Mexico
Department of Psychology
Albuquerque, New Mexico 87131

Education B.A. Psychology, B.S. Mathematics (1986) Brown University
Ph.D. Counseling and Health Psychology (1994) Stanford University
Internship (1993-1994) Stanford University Children's Hospital
Consortium
NIMH Postdoctoral Fellowship (1994-1996) Stanford University
School of Medicine, Division of Child Psychiatry

Licensure California, New Mexico

Experience

Research Assistant 1987-1988
Recurrent Coronary Prevention Project Update, Stanford University
Stanford, CA
Duties: Coordinated data collection of a large NIH-funded longitudinal study. Supervised undergraduate research assistants.

Staff Therapist 1987-1993
Stanford Counseling Institute, Stanford University
Stanford, CA.
Duties: Conducted individual therapy. Performed personality, behavioral, and career assessments. Conducted diagnostic and referral activities.

Teaching Assistant 1988
Stanford University
Stanford, CA
Duties: Taught classes and led discussions for graduate courses: Feminist Perspectives on Ethics and Education; and Affective Education. Supervised and evaluated student projects.

Research Assistant 1988-1989
Institute for Research on Women and Gender, Stanford University
Stanford, CA
Duties: Conceptualized and implemented study of women's psychological health in response to menstrual-related events.

Clinical Psychology Trainee 1989-1990
Adult and Child Guidance Center
San Jose, CA

Duties: Provided individual therapy for children, adolescents, and adults, and conducted family therapy in an outpatient setting. Co-facilitated long-term group therapy for latency age children. Performed personality and behavioral assessments.

Project Coordinator and Co-Director 1989-1995
Stanford AIDS Caregiving and Bereavement Project, Stanford University
Stanford, CA

Duties: Assisted in the conceptualization, development, and implementation of the AIDS portion (n=75) of a larger, primarily cancer-related caregiving and bereavement project (n=500). Administered a series of five psychosocial clinical interviews to each participant. Acted as liaison with hospice and home health care agency officials. Trained and provided supervision to interviewers.

Program Development Assistant and Teaching Assistant 1990-1992
HIV Project, Pacific Graduate School of Psychology
Palo Alto, CA

Duties: Researched, developed, and taught HIV clinical training program for mental health care professionals. Focused on biopsychosocial aspects of HIV, and HIV-related concerns of individuals, couples, and families.

Intern and Group Leader 1991-1992
Stanford Center for Research in Disease Prevention, Stanford University.
Stanford, CA

Duties: Facilitated six series of ten-week cognitive behavioral groups addressing adolescent drug and alcohol abuse prevention.

Research Assistant and Project Coordinator 1992-1993
Institute for Research on Women and Gender, Stanford University
Stanford, CA

Duties: Designed and implemented the American portion (n=1000) of a Japanese-American cross cultural gender roles study (n=2000) examining attitudes towards women's multiple roles.

Senior Community Health Educator and Clinical Trials Group Leader 1992-1993
Center for AIDS Prevention Studies, UCSF
San Francisco, CA

Duties: Developed educational materials for group-based intervention with HIV+ gay men. Implemented two group interventions for HIV+ gay men as part of a NIH clinical trial: a stress and coping theory-based intervention and a seropositive education intervention.

Psychology Intern 1993-1994
Stanford Children's Hospital and the Children's Health Council Consortium
Palo Alto, CA

Duties: Provided inpatient therapy to children, adolescents, and their families. Facilitated group therapy within the inpatient community. Provided evaluation and short-term therapy services for inpatients on medical pediatric units and for outpatients in pediatric clinics.

Provided consultation to pediatric clinics. Performed psychological assessments and diagnostic evaluations for adolescents and latency age children. Provided outpatient psychotherapy to children, adolescents, and their families experiencing emotional or behavioral difficulties. Treated limited number of long-term (full year) psychotherapy patients.

NIMH Postdoctoral Fellow in Child Psychiatry and Development 1994-1996
Stanford University, Department of Psychiatry, Division of Child Psychiatry

Duties: Conducted clinical and psychosocial research to identify the psychological sequelae of serious illness for both patients and their caregivers. Investigated the mediators of long term psychological health in both pediatric cancer survivors and AIDS caregivers.

Developed and conducted mental health evaluations of grade school and high school students. Provided psychotherapy to children, adolescents, and their families. Conducted evaluations and short-term therapy for inpatients on medical pediatric units and for outpatients in pediatric clinics. Provided ongoing consultation to the long term survivor (hematology/oncology) clinic.

Research Consultant 1996

University of San Francisco, Department of Pediatrics, Division of Adolescent Medicine.
San Francisco, CA

Duties: Reviewed psychoeducational materials for adolescent risk-reduction behavior within a primary care setting. Made recommendations for intervention development.

Project Director 1996-1999

Youth Studies Division, Stanford Center for Research in Disease Prevention
Stanford, CA

Duties: Designed, developed, and implemented longitudinal, multi-component, multi-site, NIH-funded school- and family-based primary and secondary obesity prevention project with elementary school students (N=1000). Coordinated the development and implementation of process and outcome evaluation components and data quality assurance protocols. Integrated components of health behavior change program based in social cognitive framework.

Supervised intervention development, implementation, and data collection staff. Maintained required reporting to regulatory and funding agencies.

Program Evaluation Consultant 1998-1999

Santa Clara Unified School District
Santa Clara, CA

Duties: Designed and developed evaluation component of tobacco cessation intervention program for high school students. Developed intervention and evaluation components of tobacco prevention interventions for middle school and high school students. Programs met Tobacco Youth Prevention Education Program regulations.

Intervention Development Consultant/Clinical Research Group Therapist 1999-2001

Stanford University Medical School, Children's Health Initiative
Stanford, CA

Duties: Assisted in focus group design, formative evaluation, and refinement of a family self-management intervention for children with chronic illness and their families. Developed focus group protocols and treatment manual for group intervention with chronically ill children. Facilitated focus groups and family self-management sessions.

Assistant Professor 1999-2007
University of New Mexico
Psychology and Pediatrics Departments
Albuquerque, NM

Duties: Conduct research in clinical child psychology with a focus on children's adjustment to chronic illness, evaluation of clinical interventions for children and adolescents with chronic illness and their families, adolescent coping, and health psychology. Develop and teach two empirically-based courses and lab each semester. Supervise research activities of undergraduate, graduate, and postdoctoral students. Supervise clinical graduate students in the Psychology Clinic. Serve on departmental committees.

Principal Investigator for Southwest Node-based Protocol 2003-2007
National Institute of Drug Abuse (NIDA) Clinical Trials Network (CTN) Protocol 0013:
Motivational Enhancement Therapy to Improve Treatment Utilization and Outcome in
Pregnant Substance Users. T. Winhusen (PI)

Principal Investigator for Ancillary Study to NIDA CTN Protocol 0013: The role of trauma in
treatment utilization and outcome, and in child abuse potential, in pregnant substance users
Duties: Designed and obtained NIDA CTN approval and support for ancillary study.
Addressed all IRB/HRRC clearances and correspondence. Addressed all reporting and
correspondence related to adverse events. Participated in national protocol conference calls.
Maintained liaison with Lead Investigator and Node. Worked closely with protocol
coordinator to ensure that tasks were completed. Convened weekly meeting of local protocol
staff. Developed publication plan for Southwest Node for Protocol 0013 and took the lead on
several publications.

Associate Professor 2007-present
University of New Mexico
Psychology and Pediatrics Departments
Albuquerque, NM

Duties: Conduct research in clinical child psychology with a focus on pediatric psychology.
Develop and teach two empirically-based courses and lab each semester. Supervise research
activities of undergraduate, graduate, and postdoctoral students. Supervise clinical graduate
students in the Psychology Clinic. Serve on departmental committees.

Interim Clinical Area Chair, Director of Clinical Training (2007).

Clinical Area Chair, Director of Clinical Training (2008- 2012).

Health Psychology Area Chair (2012-2015; 2019-present).

Associate Chair for Graduate Education (2015-present).

Associate Chair for Undergraduate Education (2018)

Principal Investigator for Southwest Node-based Protocol 2008-2010
National Institute of Drug Abuse (NIDA) Clinical Trials Network (CTN) Protocol 0032:
HIV Rapid Testing and Counseling in Drug Abuse Treatment Programs in the U.S.
Duties: Addressed all IRB/HRRC clearances and correspondence. Addressed all reporting and
correspondence related to adverse events. Participated in national protocol conference calls.
Maintained liaison with Lead Investigator and Node. Worked closely with protocol
coordinator to ensure that tasks were completed. Developed publication plan for Southwest
Node for Protocol 0032 and took the lead on several publications. L. Metsch (PI).

Co-investigator for NIH/NIDDK Randomized Controlled Trial 2019-2023
Technology Assisted stepped Collaborative Care Intervention to Improve Patient-centered
Outcomes in Hemodialysis Patients (TACCare). R01DK114085-01. NIH/NIDDK. July 2017-
September 2022. Co-Investigator (2019-2023). M. Jhamb (PI). \$2.52M.
The goal of this multi-site clinical trial was to evaluate the effectiveness of a collaborative
care intervention using telemedicine delivered psychotherapy to improve pain, depression,
fatigue and quality of life in patients on hemodialysis.

Co-investigator for NIH/NIDDK Randomized Controlled Implementation Trial 2024-2029
Technology Assisted stepped Collaborative Care Implementation Trial to Improve Patient-
centered Outcomes in Hemodialysis. R01DK114085-01. NIH/NIDDK. July 2024-June 2029.
Co-Investigator. M. Jhamb and M. Unruh (MPIs). \$3.03M.
This effectiveness-implementation clinical trial will evaluate real-world effectiveness of
TACCare 2.0 intervention for improving symptom burden in dialysis patients.

Honors

Westlake Scholarship for Academic Merit (1982-1985)
Graduated Brown University Magna cum Laude (1986)
Stanford University School of Education Graduate Fellowship (1987-1989)
California State Graduate Fellowship (1988-1990)
Stanford University School of Education Dissertation Grant (1992)
NIMH Postdoctoral Fellowship in Child Psychiatry and Child Development (1994-1996)

Research Area: Clinical Child Psychology and Health Psychology

My research interests lie within Pediatric Psychology. These interests incorporate an
attachment theory-based conceptualization of relationships and adaptation, multi-
dimensional and transactional processes concerning how children and families manage
stress, as a unifying theme.

My research program includes four primary foci: (1) an attachment theory-based
investigation of infant/toddler mental health associated with maternal parenting practices
in pediatric samples. Specifically, with infants born very low birth weight (VLBW), an at-
risk population, I have investigated infant-mother interactions and emotion regulation; the
impact of ethnicity on the relationship between maternal interactive behavior and toddler
developmental outcomes; the nature of dysregulation in this population; object
permanence that underlies early working memory; associations between maternal

scaffolding, medical severity, and executive functioning in preschoolers; associations between maternal scaffolding and toddler emotion regulation; differential associations between infant affective and cortisol stress responses among infants born very low birth weight versus full-term; the relationship between performance-based measures and naturalistic observation of executive functioning in preschoolers; associations between mother-child interactive play behavior and cognition in preschoolers born preterm and full-term; association of infant temperament and maternal sensitivity; relationship between maternal interactive behaviors and infant affect; and the association between maternal interaction and infant cortisol stress reactivity among pre-term and full-term infants. Current research addresses the longitudinal associations between maternal interactive behavior and emotion regulation among infants born premature.

(2) My second area of interest addresses disordered eating and body image concerns in preadolescent girls, including developmental considerations, the relationship of these constructs to broader psychological domains such as self-esteem, mothers' and daughters' beliefs about factors affecting girls' body satisfaction, an investigation of ethnic differences in preadolescent girls' body image, the influence of mother-daughter relationship quality on body image and disordered eating, and the psychological and physiological stress response in recovering adolescent anorexic girls. Current research focuses on specific relationship qualities (such as trust and communication) that may serve as protective factors for body dissatisfaction and disordered eating symptoms.

(3) The third research area within pediatric psychology addresses children's adaptation to chronic illness. This study of adaptation incorporates both trauma spectrum and quality of life theoretical models in understanding the long-term adjustment of children with chronic illness (pediatric cancer survivors, pediatric traumatic brain injury) and their families. For pediatric cancer survivors, I have focused on trauma spectrum adaptation; concordance between adolescent and parent proxy report of trauma symptoms; somatization; parental stress' relationship to child functional impairment; how functional impairment relates to neurocognitive and executive function deficits; associations between executive function and functional impairment; and self-reported versus parent-reported functional impairment. Current research focuses on the relationship between long-term physiological stress reactivity and family functioning among pediatric cancer survivors and their parents. For pediatric traumatic brain injury, I have investigated self-reported quality of life and family functioning.

(4) My fourth research area is an attachment theory-based investigation of college student well-being as a function of adult attachment security. A current study focuses on the degree of association between adverse childhood experiences, adult attachment security, and psychological health (global well being, adjustment to college) and distress (anxiety, depression, loneliness). Proposed mediators include self efficacy, social support, and emotion regulation. The overall aim of these research projects is to make significant contributions to the advancement of psychological clinical science and to the application of science to improving the human condition.

Research Funding

Technology Assisted stepped Collaborative Care Implementation Trial to Improve Patient-centered Outcomes in Hemodialysis. R01DK114085-01. NIH/NIDDK. July 2024-June 2029. Co-Investigator. M. Jhamb and M. Unruh (MPIs). \$3.03M.

UNM Psychology Department Grice Fund Award for continuation of “Mother-Daughter Body Image Study” (2021). Co-PI with Jane Smith, Ph.D.; \$3,000

Technology Assisted stepped Collaborative Care Intervention to Improve Patient-centered Outcomes in Hemodialysis Patients (TACCare). R01DK114085-01. NIH/NIDDK. July 2017-June 2023. Co-Investigator (2019-2023). M. Jhamb (PI). \$2.52M.

UNM Psychology Department Grice Fund Award for “Mother-Daughter Body Image Study” (2017). Co-PI with Jane Smith, Ph.D.; \$3,000

UNMH CTSC Grant for “Pilot Study of the impact of a mother’s parenting style on infant cortisol in late preterm and full-term babies.” (2013-2016). Co-I with Andrew Rowland, Ph.D. (PI in Family and Community Medicine). \$30,000.

UNMH Pediatrics Research Committee Award for “Parenting Intervention targeting Infant Stress Reactivity among Children born premature.” (2013-2014) PI, \$12,500.

UNM Psychology Department Grice Fund Award for “Parenting Intervention Targeting Infant Stress Reactivity Among Infants Born Premature” (2013). PI; \$3,000

UNM Signature Program in Child Health Research (SPCHR) Award for “Infant/Toddler/Preschooler Mental Health and Development Study.” Co-PI with Jean Lowe, Ph.D. (Pediatrics). \$3,425.

UNMHSC Pediatric Research Committee Award for “Neurocognitive and Psychosocial Risk Factors Predict Functional Impairment in Acute Lymphoblastic Leukemia: A Pilot Study” (2009-2011). Co-PI with Robert Annett, Ph.D. (PI in Pediatrics) \$9,215

UNM Pediatrics Research Committee Award for “Early executive function and attention in 18-22 month olds born very low birth weight” (2008-2020). Co-I with Jean Lowe, Ph.D. (PI in Pediatrics). \$15,000.

UNM Signature Program in Child Health Research (SPCHR) mentor for apprenticeship grant for student research project (P. Maclean) “Maternal perception of child vulnerability in preschoolers born preterm and very low birth weight” (2008-2009).\$5,000.

UNM Signature Program in Child Health Research (SPCHR) mentor for apprenticeship grant for student research project (S. Duvall) “Executive function in children born preterm and very low birth weight” (2008).\$4,000.

UNMHSC Resource Allocation Committee Award for “Facilitating School Reintegration for Children Recently Diagnosed with Acute Lymphoblastic Leukemia” (2006-2007). Co-PI with Robert Annett, Ph.D. (PI in Pediatrics). \$25,000.

UNM Pediatrics Award for “Facilitating School Reintegration for Children Recently Diagnosed with Acute Lymphoblastic Leukemia” (2006-2007). Co-PI with Robert Annett, Ph.D. (PI in Pediatrics). \$5,000.

Clinical Trials Network, National Institute of Drug Abuse (2004-2007). Support for Ancillary Study to Protocol 0013: The role of trauma in treatment utilization and outcome, and in child abuse potential, in pregnant substance users. Support for research assistant, database development, participant incentives, and statistical support. \$15,000 (PI for NIDA CTN Ancillary study).

UNM General Clinical Research Center Award for assessment component of “Toddler Mental Health and Development Study” (2004-2008). CRC statistical and personnel resources.

UNM General Clinical Research Center Award for physiological and statistical components of “Adolescent Cancer Survivor Quality of Life Outcome Study” (2001-2008). \$1500 plus CRC laboratory, statistical, and personnel resources.

Pediatric Oncology Division, Children’s Hospital at UNM, Small Grant Award for “Adolescent Cancer Survivor Quality of Life Outcome Study” (2001-2008). \$2250.

UNM Pediatrics Award for “Traumatic Brain Injury and Family Functioning” (2002-2007). \$15,000.

UNM Resource Allocation Committee Award for “Toddler Mental Health and Development Study” (2003-2004). \$3500.

Pediatric Oncology Division, Children’s Hospital at UNM, Small Grant Award for “Psychosocial Intervention for Adolescents with Cancer and their Families” (2000). \$1000.

American Cancer Society Award for “Psychosocial Intervention for Adolescents with Cancer and their Families” (1998-1999). \$2000.

Institute for Research on Women and Gender, Stanford University Award for “Pediatric Cancer Long Term Survivor Database Development” (1995-1996). \$3000.

Teaching

UNM Graduate Courses Taught: Clinical Child Psychology, Clinical Child Psychology Intervention Seminar, Child Psychopathology, Child Assessment, Child Assessment Practicum, Health Psychology, Clinical Case Formulation, Psychology Graduate Research Seminar, Ethics and Professional Issues in Clinical Psychology.

UNM Undergraduate Courses Taught: Developmental Psychology, Health Psychology, Child Psychopathology, Senior Honors Seminar.

Teaching Assistant, HIV Project, Pacific Graduate School of Psychology, Palo Alto, CA. (1990-1992). Developed portions of an HIV training project for mental health professionals and taught biomedical aspects of HIV.

Teaching Assistant, Stanford University, Stanford, CA: Feminist Perspectives on Ethics and Education; Affective Education (1988). For both graduate courses, taught classes and led group discussions. Supervised and evaluated student projects.
